Product Specification A05SK

Taconic's A05SK is a 5 thou thick, skived, virgin PTFE product with silicone adhesive, and yellow corrugated liner. Mainly used as a high temperature release material in the automotive, aerospace and composite industries as well as in cable wrap applications, A05SK is seen as offering excellent value and superior performance. Standard width of A05SK is 1000mm, with availability also as slit rolls from 10mm and upwards.

Product Properties	Units	Value	Tolerance	Test Method
Adhesive Type		**Silicone**		
Substrate Type		**PTFE FILM**		
Total Weight of Substrate	g/m2	**274.5**	+/-16,5	ISO2286-2
% Coating of Substrate		**N/A**		
Substrate Nominal Thickness	micron	**125**		
Adhesive Thickness	micron	**50**	+/-5 microns	ISO2286-3
Total Product Thickness	micron	**175**		
Adhesive Strength	N/25mm	**10**	Typical	ISO8510-2
		8	Minimum	
Operating Temperature	°Celsius	**-73° to +260°**
